

IntelliJ Installation

Install JDK 15 based on your Operating system

<https://www.oracle.com/java/technologies/javase-jdk15-downloads.html>

(Install IntelliJ community version, based on your Operating System)

<https://www.jetbrains.com/idea/>

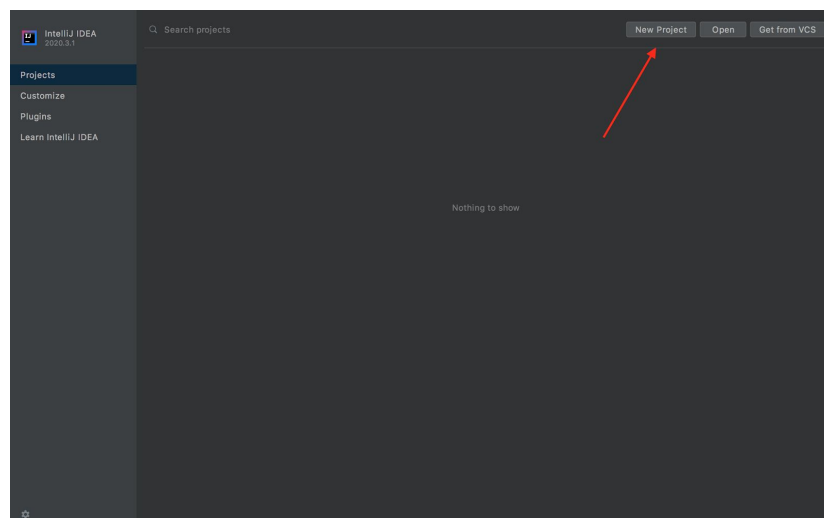

The screenshot shows the IntelliJ IDEA download page. At the top, there's a navigation bar with 'IntelliJ IDEA', a 'Choose your Operating system' dropdown menu, and links for 'What's New', 'Features', 'Resources', 'Buy', and a 'Download' button. The main content area is titled 'Download IntelliJ IDEA' and has tabs for 'Windows', 'Mac', and 'Linux'. Under the 'Mac' tab, there are two sections: 'Ultimate' and 'Community'. The 'Ultimate' section is for web and enterprise development, offering a free 30-day trial and download links for 'Download' and 'dmg (Intel)'. The 'Community' section is for JVM and Android development, offering a free, open-source version with similar download links. Below these sections is a comparison table between the two editions.

	IntelliJ IDEA Ultimate	IntelliJ IDEA Community Edition
Java, Kotlin, Groovy, Scala	✓	✓
Android	✓	✓

Create Java Maven Project in IntelliJ

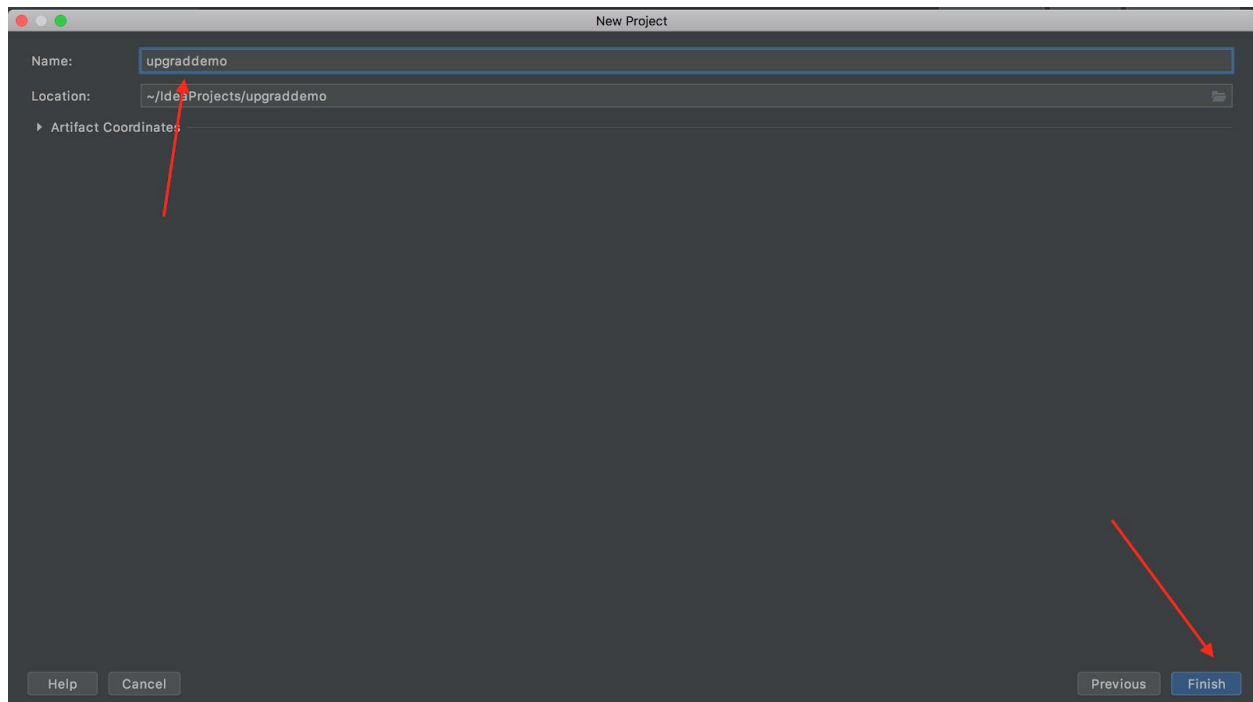

Once you have installed IntelliJ, open the application and select 'New Project'

Click Maven, Set JDK 15, and click 'Next'

Give a name to the project and Finish

Your project will be created as shown below:
